### Genetics Australia Holdings and all affiliates - Catalogue Disclaimer Statement

**Disclaimer:** The content of this Catalogue is provided for information only. It is published with care and attention to accuracy, nevertheless Genetics Australia Holdings Pty Ltd and all affiliates (GAH) accepts no liability if, for any reason the information is inaccurate or out of date whether negligent or otherwise.

**Limitation of Liability:** GAH warrants that it has clear title to the products sold and that all semen processed in its laboratory is processed under rigid quality controls. Since GAH does not control conditions under which its products are used it does not give, and its agents and employees are forbidden to give, any warranty expressed or implied as to the conception rate or productiveness or the results which may be obtained by the use of any product sold or in connection with any techniques recommended. GAH makes no other warranty of any kind whatsoever expressed or implied which extends beyond the description of its products. Where so permitted the liability of GAH for breach of a condition or warranty implied by statute is limited at GAH's option to the replacement or repair of the goods or the supply of equivalent goods or the cost of replacing or repairing the goods or of acquiring equivalent goods. So far as the law permits GAH shall not be liable in any way whatsoever for any indirect or consequential loss or loss of profit.

**Sexed (sorted) semen:** Artificial Insemination products (straws) that GAH offers for sale as sexed (sorted) semen using Sexing Technologies proprietary technology, shall only be used for single-use artificial insemination and not for in-vitro-fertilisation or embryo transfer.

**Prices:** All prices listed within this publication are listed exclusive of Goods and Services Tax (GST), so GST will be added at the time of purchase.

**Source data:** Data referencing Australian Breeding values (ABVs) information is sourced from datagene December 2024 breeding value release. Descriptions can be found at [www.genaust.com.au](http://www.genaust.com.au) for Genetic Code and Haplotype explanation.

**FRONT COVER:** Foundation Jersey cows, the cornerstone of breeding the next generation at Wallacedale Jerseys, Poowong North, Victoria. Image courtesy of Fiona Hanks.

## A GOLD MEDAL YEAR

We are very proud that in 2024, an Olympic year, that Australian bulls are the best bulls available for Australian farmers.

The final ABV release in December clearly demonstrate the strong performance of Genetics Australia sires.

This Jersey and Australian Red Breeds catalogue includes the December ABVs and clearly shows why our 2025 bull teams are the strongest we have ever made available.

Australian Jerseys top the local bull tables and are building in demand around the world, it is easy to see why. The highest bull in Australia with daughters milking and a publishable ABV is BORUNG at \$427 who is closely followed by DOUGGAN \$376 BPI

We congratulate both Brookbora and White Star Jerseys for breeding these two world class bulls. We also thank them for supplying other top bulls from their herds and to all the breeders of the other Jersey bulls in the team, several with multiple bulls in the Team. It is of no surprise that Australian Jerseys breeders have developed some of the best cow families in the world and we are fortunate many of the resulting bulls from these top families are in the current Jersey Team.

In the Australian Reds Breed, we introduce new sires ARBMOPOKE \$282 BPIg and ARBCHARLIE \$316 BPIg, as the two highest bulls standing in Australia. We thank Longroad Australian Reds and Oaklands Pastoral Australian Reds for breeding these highly rated young bulls.

These bulls are closely followed by ARBSKEETA \$270 BPIg and ARBNORMAN, a new 2025 addition and bred by Oaklands Pastoral Australian Reds.

CNLYONS remains the No.1 BPIg Illawarra sire and also tops the Sustainability Index (SI) list. He has attracted widespread interest, and we thank Hamilton's Run in Mt Gambier for breeding such a top-ranking bull.

It has been several years since we have included an Australian standing Guernsey in our team. The wait has been well worth it, PAPAZZI is turning heads with his stylish appearance and his dam well admired being an All-Breeds Champion at IDW. Based on early feedback we would be surprised if he is not one of the most popular Guernsey bulls internationally in 2025.

Also included in this catalogue are Brown Swiss and Montbeliarde sires, which are listed from leading international suppliers.

You will also find 'Summer Specials' making the team not only our best but without doubt the best value.

The December ABVs release clearly demonstrates Genetics Australia's commitment to supplying elite genetics from a wide range of breeds to current and future dairy farmers.

Bulls in the Genetics Australia teams are world class and farmers can be confident they are using elite bulls selected for their daughters to perform well in Australia.

If you would like more details on any of the bulls in the catalogue or on any service or merchandise products, please contact your Genetics Australia representative listed on the back cover.

# SUSTAINABILITY INDEX

## ...A BREEDING TOOL FOR A GREENER LOOKING FUTURE

**Australian dairy's core promise is to provide nutritious food for a healthier world.**

The dairy industries engagement is to provide a commitment of support to people in dairy, their community's wellbeing along with animals and the environment.

The herd improvement industry acknowledges the responsibility in reducing emissions across the dairy industry sector and developed the Sustainability Index to provide a breeding tool of measure. Taking the approach around introducing an "Emissions Intensity" model which maximises kilograms of milk product for every kilogram of emission generated by the cow.

Breeding decisions will complement a range of on-farm management practices to reduce emissions

### TRAIT CONTRIBUTIONS TO INDICES (JERSEYS)

### Australia's three indices

#### BALANCED PERFORMANCE INDEX (BPI)

- Economic Index
- Blends production, type and health traits according to their economic values
- In line with farmer preferences

#### HEALTH WEIGHTED INDEX (HWI)

- Fast track fertility, mastitis resistance and feed saved
- Modelled on a strictly seasonal calving system

#### SUSTAINABILITY INDEX (SI)

- Fast track genetic gain for lower emissions
- Continue gains for important economic traits

# THE BENEFITS

## Reproduction Management

Accurate heat detection 24/7 and correct timing of insemination

Maximize your ability to detect heats and improve your heat detection rate

## Disease prevention

Monitors for possible health problems 24/7

Act on diseases in an early stage and save on vet costs, drugs, labor, production loss and delayed conception.

Gain peace of mind with more control over every animal's health and production

## Saved labor

Spend less time in the barn and increase your heat detection rate

## System Flexibility

Interfaces with most management software programs

Accessible online 24/7

## Milk production

Monitor feeding behavior to optimize milk production and total herd health

**COW WATCH**

# TRACKING YOUR HERDS GENETIC PERFORMANCE WITH GENESCREEN

**“We have been continually using Genescreen for over a decade now. It assists us to increase productivity and profit through the selection of bulls that complement our herd’s genetic profile while suggesting bulls for each individual cow, helping us improve trait weaknesses in our herd, while removing the risk of inbreeding”**

– Ash & Claire Hill, Kolora, Victoria

## **Genescreen is your complete genetic analysis package.**

It provides you with individual cow mating suggestions based on either pedigree estimates or genomic breeding values. Track your herds performance through the Genescreen benchmarking module. **To order a Genescreen of your herd, contact your local Genetics Australia representative or email [genescreen@genaust.com.au](mailto:genescreen@genaust.com.au)**
